ABOUT LINK TV PROGRAMMING GET INVOLVED ORIGINAL SERIES

Home > Get Involved > One Nation

ONE NATION MANY VOICES MUSLIMS IN AMERICA STORIES NOT STEREOTYPES

Contest Dates: Contact Opens 10/02/07, Contact Closes 12/31/07, Voting Closes 1/15/08, Judging Begins 1/17/08, Winners Announced 3/20/08

Win the \$20,000 Grand Prize

Anyone in the U.S. can vote! Entries receiving the top votes in each category will be judged by our panel of judges. The winner of each category will be awarded \$5,000!

Sponsored by: **One Nation** LIBERTY AND JUSTICE FOR ALL

Featured Partner: **UPF** Unity Productions Foundation

Judges: Sara Abbasi, Danny Glover, Azhar Usman, Mariane Pearl, Kareem Abdul-Jabbar

Contest Overview

We all have stories! And we could all use a little understanding. We're offering \$50,000 in cash prizes for short videos exploring any aspect of life relating to the American-Muslim experience. While the contest is closed for submissions, you can still watch films that made it into the contest and vote for your favorites.

ABOUT LINK TV PROGRAMMING GET INVOLVED ORIGINAL SERIES

Home > Get Involved > Dear American Voter

DEAR AMERICAN VOTER...

The upcoming U.S. election will affect people all over the world, but only Americans will get the chance to vote. Would you like to send American voters a message? Make a video that tells how you would vote, and why. Even better, don't just tell them, show them: How have U.S. policies already changed the place where you live? What about the lives of your friends and family? You may not have your say in the ballot box, but you can still be heard!

Specialty Treatments

Derma Fade®
Dermal Lightening and Fading Crème
SKU: DEB-150
Size: 2 oz./56g
Price: \$36.00
[Add to Bag](#)

[Find a Salon/Spa](#)

Product Classification:
Derma Fade Crème®, a fading and lightening treatment, applied daily AM and PM, utilizes the combination strengths of both topical and oral ingredients. Both forms of active ascorbic phosphate (Vitamin C) license extract and kojic dipalmitate function as the primary active ingredients to break down any unwanted hyperpigmentation. Aside from functioning as an extremely proficient fading treatment, Derma Fade® also contains an SPF 15 used as a full sunblock for the face. In addition, Pharma C Serum® can be used under Derma Face for fast action fading of age spots and skin discoloration.

Benefits:
Ascorbic C supports cellular renewal and production of collagen (the skins major structural support). As a primary antioxidant, it sweeps out and neutralizes free radicals (unstable oxygen molecules responsible for breakdown of cells that proceeds aging and disease).

Active Ingredients:
Kojic Dipalmitate - For fading benefits. Licorice Extract - A mild antioxidant which inhibits production of tyrosinase, and enzyme produced by the body to start the production of melanin, i.e. pigmentation. Octylmethoxycinnamate and Benzophenone - Non-comedogenic PAHAA free sunscreen components for both UVA/ UVB protection at SPF 15.

Benefits:
Vitamin C supports cellular renewal and production of collagen (the skins major structural support). As a primary antioxidant, it sweeps out and neutralizes free radicals (unstable oxygen molecules responsible for breakdown of cells that proceeds aging and disease).

Skin discoloration often plagues aging skin, and studies in Japan report good results from products containing licorice, and stable forms of Vitamin C.

Licorice makes a great natural alternative to harsh chemical skin lightener / bleaching agents.

Prevent Melanin Synthesis: using a synergistic blend of tyrosinase inhibitors. Licorice Extract contains inulin which helps reduce arachidic acid which thins the skin.

SGI® InfiniteStorage SAN Solutions

Datasheet PDF | Price

Overview
Unlike other Storage Area Network (SAN) "solutions" available in the InfiniteStorage SAN Servers provide not only disk storage and a SAN robust data sharing available with SGI® InfiniteStorage Shared Filesystem. InfiniteStorage SAN 2000, SGI® InfiniteStorage SAN 3000 and SGI® InfiniteStorage SAN 4000 models give all connected systems instant access to the same data at data access wait time, and removing the cost and complexity of managing multiple SANs.

Solutions suitable for any purpose
SGI SAN Servers offer the performance benefits of SAN and the convenience of a high-performance file serving to non-SAN-connected systems.

InfiniteStorage SAN 2000 is the entry-level system, offering an economical SAN solution CXFS

InfiniteStorage SAN 3000 offers the highest performance available, combining performance storage and infrastructure components for shared data management.

SGI also offers a complete line of SAN Infrastructure solutions including Management.

Supports mixed and legacy systems
With the SGI® Open Storage initiative, InfiniteStorage SAN Gateway provides a smooth transition of legacy storage hardware investment, with support of SGI, non-SGI environments.

SAN management
SAN management and storage resource management (SRM) encompasses:

- Understanding what resources you have on your SAN and how to use them

Data Migration Facility

Datasheet PDF | Price: Ask a Sales Rep

Overview
In the typical data life cycle, new data is accessed intensively. As data ages, it is accessed less frequently and may remain dormant for many months or even years, although it may occasionally undergo brief periods of renewed intense access. SGI helps customers flexibly and economically adapt to changing data access patterns with SGI InfiniteStorage Data Migration Facility.

DMF transparently migrates files from online storage to near-line storage based on user-defined criteria such as time of last access. Without DMF, the only choice most sites have is to either maintain a huge pool of inactive data on expensive disk storage or manually archive that data to tape, where it is difficult or impossible to access.

With DMF, a nearly infinite data store can be cost-effectively maintained and managed without sacrificing accessibility. All data is transparently recalled to primary storage when accessed, so users never need to know where the data resides. Many SGI customers are already using DMF to manage over a petabyte of data with no end in sight.

Hosted on either IRIX or Linux systems, DMF can also be used in conjunction with SGI InfiniteStorage NAS and SAN solutions to provide transparent data lifecycle management services across Windows®, Mac OS® X, Linux® and Unix® environments to transparently access data on multiple tiers of storage.

SGI® InfiniteStorage 350

Datasheet PDF | Price

Overview
The SGI InfiniteStorage 350 is a SATA-only storage system that deliver high capacity, and performance typically found only in enterprise class storage. It previously relied on distributed Direct Attached Storage (DAS) and now offers a single easy to manage system. For environments with more complex needs, the 350 is a building block for data lifecycle management, disk to disk backup and replication applications.

Highlights

- Value-priced, high capacity SATA RAID
- Dual integrated controllers
- 4 Gb fibre channel connectivity
- 8TB in a compact 3U enclosure

Features and Benefits

- Superior performance
- High-density and low-cost capacity
- Rock-solid reliability and availability
- Lower total costs

Resource Manager

SGI® SAN Management and Storage Resource Management Solutions

Simplify Storage Network Management
To help you reduce the operational costs of managing your SGI InfiniteStorage solutions, as well as your heterogeneous SAN, NAS, and DAS resources, and to improve the performance, availability and utilization of your SAN-hosted applications, SGI offers the industry's leading storage area management solutions through an alliance with AppIQ.

SGI InfiniteStorage Resource Manager
In September 2003, SGI and AppIQ announced a strategic alliance that has resulted in SGI bundling components of AppIQ's SAN management technology with SGI InfiniteStorage SAN solutions. SGI InfiniteStorage Resource Manager provides comprehensive, standards-based management of the SGI InfiniteStorage solution set, including CXFS, IRIX®, Altix®, Brocade®
